# **International standards on cyber security ISO perspective**

***Peter Linders***

***(Chair, DITTA Standards WG)***

**DITTA Workshop on Cybersecurity**

**March 17, 2018 (Shanghai)**

# Points for discussion

## Cyber security is not:

- an ISO-only thing
- a manufacturer-only thing
- a medical-only thing
- going away

# Points for discussion

## Cyber security is:

- part of risk management (all parties)
- supported by standards
- a joint, ongoing effort
- something we have  
to “live with”

# Points for discussion

**Cyber security in medical care has some specific elements. It must:**

- not obstruct care delivery
- nor distract from it
- be there for all pro's ...
- ... and for others too

# Points for discussion

## Cyber security thus requires:

- a joint approach of ...
- all stakeholders, and ...
- a continuous effort ...
- to be “cyber savvy”
